Title : Apparatus and method for controlling brake using brain waves

Commissioner of Patents and Trademarks

Washington DC 20231

INFORMATION DISCLOSURE STATEMENT

Dear Sirs:

Korean Patent Application No. 1993-21335 is directed to an apparatus for controlling brake. The apparatus comprises a brain wave sensing portion (10) for sensing driver's brain wave and converting the signals into electrical brain signals; amplifier (20) for amplifying the electrical brain signals outputted from the brain wave sensing portion (10); D/A converter (30) for converting analog type signal outputted from the amplifier to digital type signal; memory (60) for digitalizing and storing specific brain wave of urgent situation as reference brain; microcontroller (40) for comparing the signal outputted from D/A converter (13) with stored reference signal and outputting brake pedal driving control signal in urgent situation; and brake driving portion (60) for operating foot brake pedal depending control signal outputted from the microcontroller (40).

Respectfully submitted,
